

## VEHICLE MOUNTED FIRE PUMP MARINE GRADE FIRE PUMP

Works Perfectly...

DP2000BZ - DP3000BZ Normal & High Pressure Pump for Fire Truck

DUPAMP - FIRE PUMP WORLD 1. ASO OSB Erkunt Cad. No:6 06935 Sincan - Ankara - TURKIYE

## DP2000BZ - DP3000BZ Series

| General Features                           | Technical Features |                         |
|--|--------------------|-------------------------|
| EN – 1028 Certificate                      |                    |                         |
| Bronze or Brass Pump Body Material         | Туре               | DP2000BZ, DP3000BZ      |
| Thermal Expulsion System                   | туре               | DI 2000D2, DI 3000D2    |
| Mechanical Stuffing Impermeability         | Rotation           | 3000 r/min              |
| Oil Less Automatic Suction System          |                    |                         |
| High Pressure By-Pass System               | Norm. Flow Rate    | 2000 - 3000 It./min.    |
| Two Stages Centrifugal Fire Pump           | High Flow Data     | 050 400 lt /min         |
| Two Bronze Impeller Material               | High Flow Rate     | 250 - 400 lt./min.      |
| Low-Level Sound                            | Norm.Pressure      | 10 - 15 bar             |
| Bronze Bedding From 2 Points               |                    | 10 10 54                |
| Optionals                                  | High Pressure      | 40 bar                  |
| Foam Estimator                             | Running Temp.      | -15°c / +55°c           |
| Multi Outlet Collector                     |                    |                         |
| High Pressure Distributor                  | Step Number        | 1 Step                  |
| Pump Control Panel With Changeable Options | In / Out           | A" (optional 5") / 2 5" |
| Changeable Coupling Options                | In / Out           | 4" (optional 5") / 2,5" |
